Document Title: Business Requirements Document — ARM Farms eCommerce Platform

Client: ARM Farms

Prepared By: Quantix Media

Version: 1.0

Date: July 14, 2026

Status: Draft — Pending Client Confirmation & Sign-off

Document Purpose

This Business Requirements Document (BRD) defines the functional and non-functional requirements for developing a scalable eCommerce platform for ARM Farms.

The platform will initially support the online sale of fresh mangoes and is designed to scale in the future to support additional product categories such as edible oils and other agricultural products, without requiring major redevelopment.

This document serves as the primary reference for UI/UX design, development, testing, deployment, and client approval.

1. Project Objective

Develop a secure, scalable, and fully customizable eCommerce platform that enables ARM Farms to:

- Sell products directly to retail (D2C) customers
- Sell products to wholesale (B2B) customers
- Manage products, inventory, orders, shipping, customers, and marketing from a centralized admin panel
- Support future expansion into multiple product categories
- Integrate payment gateways, courier services, notifications, and analytics

2. Business Overview

Attribute	Detail
Company Name	ARM Farms
Target Market	India
Supported Language	English
Business Models	D2C (Retail Customers) and B2B (Wholesale Customers)

3. Scope of Phase 1

Initial Product Launch

- Fresh Mangoes

Future Expansion

- Edible Oils
- Additional Agricultural Products
- New categories without redevelopment

4. User Roles

4.1 Visitor

- Browse products
- Search products
- View offers
- Register
- Login

4.2 Retail Customer (D2C)

- Register / Login
- Purchase products
- Maintain addresses
- View order history
- Download invoices
- Track orders
- Submit reviews
- Raise complaints

4.3 Wholesale Customer (B2B)

- Business registration
- Upload GST & PAN
- Admin approval
- View wholesale pricing
- Place bulk orders
- View business order history
- Download tax invoices

4.4 Admin

Manage:

- Products
- Categories
- Inventory
- Customers
- Orders
- Reviews
- Reports
- Notifications

4.5 Super Admin

- Create admin users
- Assign permissions
- Configure system settings
- Access complete reports

5. Website Workflow

The end-to-end customer journey on the platform follows the sequence below:

- 1. Visitor
- 2. Homepage
- 3. Browse Categories
- 4. Product Listing
- 5. Product Details
- 6. Add to Cart
- 7. Login / Register
- 8. Address Selection
- 9. Shipping Calculation
- 10. Payment
- 11. Order Confirmation
- 12. Notifications
- 13. Order Tracking
- 14. Invoice Download
- 15. Delivery
- 16. Product Review / Complaint

6. Homepage

The homepage shall include:

- Hero Banner (configurable)
- Promotional popup (configurable)
- Featured products
- Best-selling products
- New arrivals
- Categories
- Customer reviews
- About ARM Farms
- Contact information
- Footer

All homepage sections shall be manageable through the Admin Panel.

6.1 Banner Management

Admin shall be able to:

- Add banner
- Edit banner
- Delete banner
- Enable / disable banner

6.2 Popup Management

Admin shall be able to:

- Upload popup image
- Configure offer text
- Enable / disable popup

7. Product Categories

Initially

- Mangoes

Future

- Oils
- Organic Products
- Additional Categories

Admin Capabilities

- Add category
- Edit category
- Delete category
- Enable category
- Disable category

8. Product Management

Each product shall contain:

Field	Details
Product Name	—
Product Images	3–4 images
Description	—
SKU	—
Category	—
Retail Price	—
Wholesale Price	—
Retail Minimum Order Quantity	3 KG
Wholesale Minimum Order Quantity	100 KG
Stock Quantity	—
GST Percentage	Configurable
Product Status	—

9. Inventory Management

Inventory shall support a single warehouse.

Stock Management

- Automatic stock deduction after order
- Manual stock update
- Low stock notification
- Reorder level configuration
- Critical stock alert

When Stock Reaches Zero

- Show “Out of Stock”
- Allow pre-order (configurable)

Admin Notifications

- Dashboard alert
- Warning notification

10. Customer Registration

Supported Login Methods

- Mobile OTP
- Email OTP
- Email & Password

Customers Can

- Maintain multiple addresses
- Save payment methods
- Manage profile

11. Wholesale (B2B) Registration

Business registration fields:

- Company Name
- GST Number
- PAN Number
- Contact Person
- Email
- Mobile Number
- Business Address

Business accounts require Admin approval before accessing wholesale pricing. Wholesale pricing shall be completely configurable from the Admin Panel.

12. Shopping Cart

Customers can:

- Add products
- Update quantity
- Remove products
- Save for later
- Apply coupons (if available)
- Continue shopping
- Proceed to checkout

13. Checkout

Checkout flow:

- 1. Cart
- 2. Login
- 3. Address
- 4. Google Location Detection
- 5. Shipping
- 6. Payment
- 7. Order Confirmation

13.1 Address Management

Customers can:

- Add multiple addresses
- Edit addresses
- Delete addresses
- Auto-detect current location

14. Payment Gateway

Gateway: Razorpay

Supported modes:

- UPI
- Credit Card
- Debit Card
- Net Banking

Razorpay charges 2% per transaction. This is a third-party cost payable by the client; Quantix Media can assist with account setup and integration.

15. Shipping

Primary Courier: India Post

Secondary Courier: Blue Dart

Features

- Tracking number (AWB display for customer)
- Estimated delivery date
- Shipment status
- Delivery updates

Free Shipping

- Orders above ₹1,500

16. Order Management

Customer can:

- View orders
- Track orders
- Download invoice

Order Status

- Pending
- Confirmed
- Shipped
- Out for Delivery
- Delivered

Order Cancellation

- Not allowed

16.1 Customer Support

A dedicated **Customer Support Bot** shall assist customers with the following services:

- Delivery delay inquiries
- Replacement requests
- Damaged product and packaging complaints
- Order status assistance
- Escalation to a customer support executive (if required)

17. Reviews

Public product reviews — customers can:

- Rate products
- Write reviews
- Upload images

Admin can:

- Edit and Delete reviews
- Hide reviews

18. Customer Dashboard

- My Profile
- Saved Addresses
- Order History
- Invoice Download
- Complaint History
- Wishlist
- Notifications

19. Notifications

Channels

- WhatsApp
- SMS
- Email

Notification Events

- Registration
- OTP
- Order Confirmation
- Payment Success
- Shipped
- Delivered
- Complaint Updates
- Replacement Updates
- Low Stock Alert (Admin)
- Reorder Alert (Admin)

20. Marketing Module

Admin shall manage:

- Homepage banner
- Popup offers
- Featured products
- Best sellers
- New arrivals
- Blog module

21. SEO Module

Support

- Product SEO
- Category SEO
- Blog SEO
- Meta Title
- Meta Description
- Sitemap.xml
- Robots.txt

Integrations

- Google Analytics
- Google Tag Manager
- Meta Pixel
- Google Search Console

22. Reports

Revenue Reports

- Daily
- Weekly
- Monthly
- Yearly

Other Reports

- Sales Reports
- Order Reports
- Customer Reports
- Inventory Reports

Export

- Excel

23. Admin Dashboard

Dashboard cards:

- Total Revenue
- Total Orders
- Pending Orders
- Delivered Orders
- Total Customers
- Retail Customers
- Wholesale Customers
- Inventory Status
- Low Stock Products

24. Admin Permission Management

Super Admin shall be able to:

- Edit admin users
- Assign custom permissions

Permission Modules

- Products
- Orders
- Customers
- Inventory
- Reports
- Marketing
- Settings

25. API Integrations

Required integrations:

- Razorpay API
- India Post API
- Blue Dart API
- WhatsApp Business API
- SMS API
- Email API
- Google Maps API
- Google Places Autocomplete API
- Google Geocoding API
- Google OAuth API
- Google Analytics API
- Google Tag Manager
- Meta Pixel

Third-party API and platform costs (e.g., Razorpay, courier, WhatsApp/SMS, Google services) are borne by ARM Farms as the account owner. Quantix Media will assist with setup, configuration, and account onboarding for all third-party services.

26. Non-Functional Requirements

- Fully responsive design
- Mobile-friendly admin panel
- Secure authentication
- Scalable architecture
- SEO optimized
- Fast page load
- Modular development

28. Client Confirmation Required

The following requirements require confirmation before development begins:

Business

- GST billing required
- GST invoice format

Shipping

- Shipping charge calculation method
- Pincode serviceability check
- Scheduled delivery
- Courier selection logic

Notifications

- WhatsApp provider
- SMS provider
- Email provider

Inquiry Bot

- Human executive escalation

Legal Pages

- Privacy Policy
- Terms & Conditions
- Refund Policy
- Shipping Policy
- Cancellation Policy

Future Scope

- Mobile applications
- Subscription orders
- Loyalty program
- Referral program
- Additional product categories

Infrastructure

- Domain registration
- Hosting plan
- SSL certificate
- Expected monthly traffic
- Expected product count after one year

29. Assumptions

- The website is intended for customers within India.
- Initial launch includes mango products only.
- Additional categories will be introduced in future phases.
- The client will provide all product data, pricing, content, legal documents, and branding assets.
- Third-party API timelines are dependent on respective providers.

30. Project Timeline

Phase	Estimated Duration
Requirement Finalization	3–5 Days
UI/UX Design	10–15 Days
Frontend Development	15–20 Days
Backend Development	20–25 Days
API Integration	7–10 Days
Testing & Quality Assurance	7–10 Days
User Acceptance Testing (UAT)	5–7 Days
Deployment & Go-Live	2–3 Days

Estimated Project Duration: 60–70 working days

The timeline is subject to timely client approvals, content availability, and third-party API approvals and configurations.

31. Sign-Off

The client's approval of this Business Requirements Document confirms agreement with the project scope, functional requirements, assumptions, and identified confirmation items. Any changes requested after approval may be evaluated separately and could impact the project timeline and commercial scope.
